LOW-PROFILE AIRPORT BARRICADE

FAA

Aerocade® Low-Profile Airport Barricade

The Aerocade® Airport Barricade is a low-profile, water-filled, collapsible channelization device used to delineate work zones for construction and maintenance on airport runways and taxiways. Aerocade® can be interconnected end-to-end for use as a demarcation device and can be accessorized with warning lights and flags.

The Aerocade® Low-Profile Airport Barricade is designed to FAA Advisory Circular 150/5370-2G.

FEATURES

- Reflective sheeting for increased visibility.
- Can be accessorized with warning lights and flags.
- Stackable for more efficient transportation and storage.
- Lightweight system enables convenient positioning by hand.
- Jet blast resistant design when properly filled with water.
- Available in orange or white.
- FOD free
- Collapsible
