

KonaPost[®]

DELINEATORS

KonaPost

The KonaPost® delineator post is an alternative to traditional orange cones. It is ideal for reoccurring applications where orange cones or markers are often impacted and must be quickly deployed in specific patterns on a regular basis. The KonaPost® is designed to take multiple impacts and stay in place. It has been tested to take over 200 direct wheel impacts at 45 mph. The flexible 6" plug inserts into a hot-dip galvanized steel receptacle that is recessed into the pavement.

APPLICATIONS

The KonaPost® can be used as a channelizing, marking, and delineation device. Applications include:

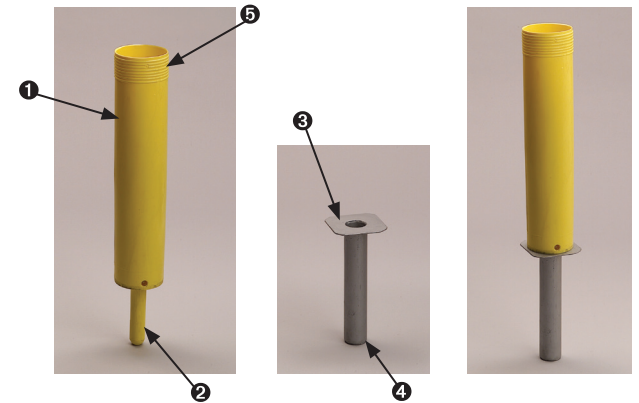

- Gate closures
- Reversible lanes
- Lane redirect
- Parking lots and garages
- Event management

FEATURES

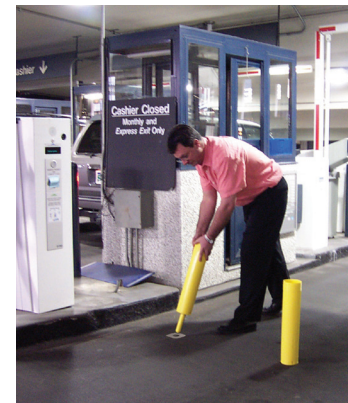

- Tested for impact resistance.
- Round post design can provide increased visibility in up to 360° direction.
- No protruding metal parts.
- One piece post construction.
- Designed to remain flexible over a wide temperature range.
- Reflective sheeting available.
- Available in white, yellow, and orange
- Custom colors available

SPECIFICATIONS

- Post Height: 19" (483 mm)
- Post Width: 4" (102 mm)
- Plug Height: 6" (152 mm)
- Receptacle Plate Width: 4.5" (114 mm)
- Receptacle Depth: 8" (203 mm)

- 1 Injection Molded Plastic
- 2 6" Durable Plug Helps Facilitate Self Righting, Accurate and Consistent Placement
- 3 8" Hot-dip Galvanized Steel Receptacle
- 4 Receptacle Designed to Help Post Stay in Place. Tested to over 200 impacts @ 45 mph
- 5 Raised Circumferential Ribs Allow for Gripping When Placing and Removing From Receptacle
