## Single Point Protector

The RAPTOR® is a compact crash cushion made from durable HDPE which can be installed at sites that are lacking space to protect objects in the traditional manner. The system consists of 2 pieces which connect together and provide protection from a rigid object such as a pole or tree that is positioned within the central void.

The RAPTOR® 600 has been tested to MASH Test Level 1.

### FEATURES

- Reduces the severity of vehicle impacts against poles and trees.
- Available in black or yellow.
- Typically installs in under 30 minutes.
- Two sizes available to fit multiple hazard widths.
- Non-impacted side is typically reusable.
- No anchoring required.
- Zero maintenance required, other than routine inspection.
