## BARRICADES

# Yodock® Traffic Control Solutions

Valtir Rentals offers traffic control products centered on the patented, water-filled Yodock® 2001, 2001M, and 2001MB barricades. When the interlocking units are assembled as a Longitudinal Channelizing Device (LCD), the barricades can be used to delineate vehicular and pedestrian traffic flow.

Yodock® barricades are made in the USA and tested to NCHRP Report 350 Test Level 2 and Test Level 3. The barricades can be assembled to meet a variety of traffic control applications, including Traffic and Pedestrian Channelization, Longitudinal Barrier Wall, Temporary Sign Support, and Work Zone Barricade.

Additional accessories are available that allow Yodock® barricades to be used for perimeter fencing, pedestrian walkways, and lane closures. Flexible rental options can help reduce capital costs and storage concerns.

## FEATURES

- Lightweight units for convenient positioning by hand.
- Stackable for more efficient transportation and storage.
- Convenient forklift access for maneuverability.
- Flexible rental options.

## FHWA ELIGIBILITY

- Longitudinal Channelizing Device (LCD)
- Work Zone Barricade
- Temporary Sign Support
- TL-2 and TL-3 Longitudinal Barrier Wall (When used with Steel Rail Kit)
